CertainTeed Shingle Masters,
BP Canada & Malarkey Certified

When it comes to shingles, YOU'VE GOT CHOICE

We recommend these high quality shingle options for their strength, durability and lifetime value—but we can install any asphalt or laminate shingle you'd prefer.

GOOD

CERTAINTEED LANDMARK

- Heavier by design - greater shingle weight translates to greater durability
- Warranty coverage includes all manufacturing defects. It is not a "leaks only" or "performance only" warranty. Aesthetics including delamination, degranulation, cracks, curls and shading are also covered.
- Landmark's Quadra-Bond Technology yields a very aggressive sealant reducing the likelihood of wind blow.
- Patented Certa-Blend Technology means no Lot #s or Run #s guaranteeing that colours will always match.

CertainTeed SAINT-GOBAIN

BETTER

MALARKEY VISTA

- Sustainable post-consumer polymer modified asphalt technology increases flexibility and granule adhesion.
- Shingles are more resistant to tearing and nail pull-out, reducing the risk of shingle blow off.
- Class 3 impact resistance offers a high rate of protection in hail storms.
- Specially formulated asphalt sealants hold the shingle in place during high winds and are effective in the event of wind driven rain.
- Asphalt technology provides flexibility for application in a wide range of climates and roof styles.

Malarkey Roofing Products®

BEST

MALARKEY LEGACY

- This is the shingle every other manufacturer wishes they had. It's the gold standard against which all others are compared.
- Flexor polymer modified asphalt increases flexibility, granule adhesion and impact resistance.
- Class 4 impact resistance offers the roof the highest rated protection available.
- Scotchgard protection helps maintain the aesthetic appearance of the roof.
- The "Z" zone nailing area dramatically improves correct fastener placement during installation.

Malarkey Roofing Products®

THE ROADHOUSE ROOFING DIFFERENCE

QUALITY WORK

From our first meeting, through to clean-up at the end of a job, we deliver peace-of-mind. We strive to exceed industry standards, guarantee our work, and are here to protect and maintain your roofing investment.

Be sure to ask your contractor for their references. Just ask for ours - they speak for themselves.

QUALITY PRODUCTS

We install innovative, premium roofing products like Titanium UDL25 PLUS Underlayment, Malarkey and CertainTeed Shingles, and Duraflo TurboPro Vents so we can guarantee your home is covered with the longest lasting, highest quality roof installation.

Ask your contractor for details about the products they supply.

RESPECTFUL & RESPECTED EMPLOYEES

You'll find that our most important asset is our friendly, respectful, safe, skilled and hardworking team. We keep them well trained with the latest techniques and pay by the hour — not by 'the bundle'. Our focus is on high quality installation, not high speed.

Ask how your contractor pays their crew, and you'll learn what's most important to them.

RELIABLE

Our team is trained, licensed, insured and certified. We honour our quotes without add-on surprises and we'll keep you informed all along the way. We're *Fall Arrest* and *First Aid/CPR* trained and we follow all Occupational Health & Safety requirements.

Always ask your roofing contractor to show you their WCB clearance, staff training certificates and proof of liability insurance coverage.

METICULOUS CLEAN UP

Clean up is an important part of the job that many contractors neglect. We take pride in our job site cleanup — your eaves, lawn and driveway will be immaculate — we even check for debris on your neighbours' properties.

Be sure your roofing contractor doesn't ignore their responsibility to leave your property nail and debris free.

Shopping around? Be sure to ask the important questions.

WHY CHOOSE ROADHOUSE ROOFING?

We treat our clients' homes as if they were our own.

THESE SERVICES ARE STANDARD - NO EXTRA CHARGE!

- We remove & dispose of old shingles.
- We replace roof deck board as required.
- We install 6 feet of ice & water membrane to protect against water back up and ice damming, ensuring at least 3 feet inside interior wall.
- We cover the balance of the roof in Titanium UDL25 PLUS.
- We install new drip edge to protect the roof deck.
- We remove existing roof venting & exhaust flashing and upgrade to premium venting solutions.
- We install additional roof vents as required to ensure roof has proper & sufficient ventilation.
- We clean out your eavestroughs.
- We trim overhanging branches at your request.
- We finish every job with meticulous site clean up.
